

Water Cooler Accessories

Drip tray overflow options

3 litre Overflow Container (WB4465)

The 3 litre Overflow Container connects to the prepared outlet on the Drip Tray. The Container is alarmed to indicate when full and has a tap to empty. The 3 litre Overflow Container can be Factory Fitted or Self Installed.

Waste System (WASTEKIT114)

A Waste System which connects the Drip Tray straight to Waste. It requires a modification of the Drip Tray and is therefore only available Factory Fitted.

10 litre Overflow Container (OVERFLOW10)

The connects to a specially prepared connection on the Drip Tray and required modification to the lower panel. The Container is alarmed to indicate when full. The 10 litre Overflow Container is only available Factory Fitted.

Pumped Waste System (PUMP2L)

Pumped Waste System which can pump the waste from the drip tray over a distance of 100m and a rise of up to 5m into waste. Factory Fitted only.

Over 170,000 Water Coolers sold tells the story of our success.....
