

**Issue 19** The information hub is designed to provide - mainly technical - information relating to Water Coolers and Boilers, to assist you with your work

## What is WRAS Approval?

Any water fitting, which when installed will carry or receive water from the public mains water supply in the UK, must comply with the Water Supply (Water Fittings) Regulations or Scottish Bye-laws. These require that a water fitting should not cause waste, misuse, undue consumption or contamination of the water supply and must be 'of an appropriate quality and standard'.

One of the main objectives of WRAS is to ensure that the mains water supply is not contaminated or that water is wasted, by connecting an appliance to the mains water supply.

WRAS Approval is the easiest way to demonstrate compliance, as it is granted directly by representatives of the water suppliers and is therefore accepted by every water supplier in the UK.

Safe  
Efficient Water**

CERTIFICATION MARK

## WRAS Product Approval:

Whole products, such as POU Cooler, Boilers and POU Installation Rails undergo mechanical and water quality testing.

AAfirst supply's a range of products which comply with the requirements of the United Kingdom Water Supply (Water Fittings) Regulations and Scottish Water Bye-laws.

All of AA First's mains connected products are manufactured to comply with the U.K. Water Supply (Water Fittings) Regulations or Scottish Bylaws, but may not have been WRAS tested and approved.

Please look at our product information to see which coolers have been approved and certified.

WRAS Approval Number: 1702077
